"Today 1<sup>st</sup> July, 2008 has been a turning point for Numa Feeds, after signing a grant agreement approved by the president of African Development Foundation for the award of US\$ 100.000 towards capacity Building. It is now six years since I made my first knock on your office, I did not know that from that day you were planning for me by preparing us to reach to this point. It has been a great experience right from when I joined Enterprise Uganda family, everybody so willing to help, am really touched to the core of my heart." **Robert Matsiko, Managing Director NUMA FEEDS LTD, Kabwohe**

"Since I attended the Entrepreneurship Training Workshop, I have never looked back! Before the training I was extremely stressed and even had no time for my family and myself. I was always busy fire fighting and this gave me no time to contemplate the future of my company. I learnt many things at the workshop and what I value most is the ability to create and maintain systems. Systems have freed me and as a result I am getting the best out of my employees, my profits are going up, the work place is a happy one and I now have time for my children and myself. I have recommended the course to many of my friends who have noted my positive change. I hope they too can have the same opportunity that I had. The training has improved my confidence as a Manager. I take more calculated risks, market more and the numbers of my corporate clients have increased".

**Charlotte Kamugisha, Executive Director, Bunyonyi Safaris Ltd. Kabale**

"Our Business was low and orders were not flowing continuously. Enterprise Uganda helped us in isolating the particular competencies to utilize in business in our case: Setting goals and planning; Persistence; Networking. These particular three have been developed since training. The company is now well known and we have also gained approval from former competitors, who actually place orders with us at negotiated rates." **Batte David, Director - CONCRETE K. LTD.**

"From income earned from my restaurant business, I have been able to start the business of produce buying and my total investment has now doubled"

**Christopher Ayoo, Amuru Ribbe ber Integrated, Amuru district**
